

E-Jet V0

Cost-effective Variable Dot Printer

Conveyer system

- The feeding roller increases from 12mm to 20mm, to be a whole one
- More perfect hexagon pinch roller design, to solve your problem of long length printing, to ensure the stability movement of carriage, longer life & less noise

Ink supply system

- Adopt continuous ink supply system, to adjust ink level can support much convenient high speed & long time printing

Multi-stage Heating system

- Pre-heating, platform heating & Post heating can better improve the absorption of materials. To highly improve your printing efficiency, Infrared heating system is optional supplied

Adjustable height of print head and better suction system of platform

- The height of print head can be adjusted within 1.7mm~ 2.5mm, which can be fit for more material
- Better suction system of platform can solve the problem of rubbing printhead caused by printing thicker material, can protect & lengthen the life of printhead

Cleaning system

- Lifting design of ink stack can solve your problem of difficult ink stack counterpoint and ink pumping

Automatically take-up & release system

- To ensure the smooth & stable output when printing

High printing Quality

- Multi-level gray and variety of feather let your color much more smooth & much better precision
- Humanized design make you to print more comfortably

Stable & Simple
with **Quality**

Specification

	High quality model: 720×1440dpi 8m ² /hr		EPSON DX5 print head
Resolution & Speed	Production model: 360×1440dpi 15m ² /hr High speed model: 360×720dpi 30m ² /hr	Print head	Minimum 3.5 pl variable ink-drop nozzle Auto suck ink, ink suck protect system
Feeding system	Release media without motor, taking material with motor and tension system	Media	Modalities: Roll to Roll media Specification: Max width 1.6 meters, unlimited length Classifications: Banner, sublimation paper, PE, PP, ABS, PU, Vinyl
Inks	4 colors or 6 colors, apply for eco-solvent, water-base and dye sublimation ink	Print format	PDF, PS, EPS, TIFF, AI etc. (RGB/CMYK)
RIP	PhotoPrint, Seeget, MainTop	Environment power	Temperature: 20-30°C Humidity: 45-75%RH Gross power: 3.5KW
Format dimension	2800L × 700W × 950H(mm)	Weight	200KG
